

Helpful Resources for Educational Video Production

Overall Guides:

1. Video Production Guide
<http://web.mit.edu/techtv/videoprodguide/videoprodguide.pdf>
A series of thorough yet concise tips covering many aspects of video production from MIT's (now closed) video hosting platform, TechTV.
2. The Fundamentals of Video Production
<http://www.tandfonline.com/doi/abs/10.3109/17453054.2010.510786>
This article from the Journal of Visual Communication in Medicine outlines a workflow for the production of high-quality video.

Pre-production

1. Clinical Teaching Resources
<http://www.mitemmc.org/resources-category/clinical-teaching/>
A broad selection of helpful resources for clinical teaching from the MMC Institute for Teaching Excellence.
2. How Video Production Affects Student Engagement: An Empirical Study of MOOC Videos
<http://dl.acm.org/citation.cfm?id=2566239>
An enlightening look at optimal length for educational videos based on data from EdX, a massive open online course platform founded by Harvard and MIT.

Production

1. Shooting Video with an iPhone
<https://wistia.com/library/shooting-video-with-an-iphone>
A quick video tutorial on iPhone-based video production.
